

Practable Portal – Datasheet

Compact interface for connecting experimental hardware to Practable servers.

Key Features

- Raspberry Pi Single Board Computer (Portal Interface)
- Adjustable Power output (3.3–20V @ 3A)
- 5V rail for Raspberry Pi & Accessories (3A)
- OLED status display
- Network connectivity with Serial pipeline
- Remote Power Cycling
- Voltage & power monitoring

Electrical Specs

Input:

- 24V DC @ 3.5A

Outputs:

- Adjustable: 3.3–20V @ 3A -> Experiment Power
- Fixed: 5V @ 3A -> Raspberry Pi Power

Display Info

Displays for each voltage rail:

- Voltage (V)
- Current (A)
- Power Consumption (W)

Along with Network Stats:

- MAC Address
- IP Address if valid connection available

Applications

Remote labs, experimental setups, IoT interfacing.
